

Stetzer Electric, South Korea enter a new joint adventure

By Sally Rogstad

Stetzer Electric of Blair, has been marketing its Electro Magnetic Interference Filters for years in countries like Israel, Australia, New Zealand and in Europe.

This week the firm adds South Korea to the list of distributors of Stetzerizer Products.

The Electro Magnetic Interference filter that Stetzer sells reduces or removes high frequency energy from the wires of your building to you.

Medical research has shown that the high frequency magnetic interference that runs from electronics, light bulbs and other household items, can

cause major health problems in humans and animals.

High frequency magnetic energy

can cause “radiowave sickness”. Symptoms are similar to, chronic fatigue syndrome, fibromyalgia, ADD, and ADHD and surpluses the auto immune system; therefore several hospitals in South Korea have ordered filters.

Stetzer Electric has patents and distributors in most major countries around the world.

More information on Stetzerizer products is available on

stetzerelectric.com. The site has links to the South Korean company and other distributors.
